Any freight bills which are subsequently litigated or placed for collection with a collection agency, and attorney or other authorized agent shall be assessed an additional twenty five percent(25%) of the initial BBF charges for each such shipment and in addition the debtor will be responsible for the attorney fees and/or court costs incurred by BBF to collect payment. The cubage of loose articles, pieces, or package articles shall be determined by multiplying the greatest straight-line dimensions(not circumference) of length, width, and depth in inches, including all projections, and dividing by 1728 cubic inches(one cubic foot). The density shall be the result of the division of the weight per article, piece, or package by the cubage determined. The weight per cubic foot relates to the density of each shipping package or piece and not to the shipment as a whole.

ITEM # 290-SQUARE YARD CALCULATION

If square yardage is not shown on a BOL, for purposes of line-haul charge calculation yardage will be determined by dividing weight by 3.5 pounds per square yard.

ITEM # 300-MARKING OR TAGGING FREIGHT

For marking or tagging freight generally the provisions of NMFC Item 580 will apply. BBF will at specific instruction of a shipper or consignee change or alter the markings or tags on any package in accord to those instructions, subject to the following charges: \$2.00 per package or piece of freight on which the marking or tag is changed or altered, with a minimum charge of \$25.00 per shipment. All charges accruing under the provisions of this Item must either be paid by the party requesting the service or, or guaranteed to the satisfaction of BBF, before the service will be performed.

Commodities requiring special or additional care or attention in handling or stowing must be appropriately marked and packaged to ensure safe transportation.

ITEM 310-BILL OF LADING

Unless otherwise agreed to in writing, Contract Terms and Conditions shall be those as indicated in BBF's Bill of Lading or in the NMFC-100 Item 365 "Uniform Bill of Lading" in effect on the date the shipment was tendered to BBF. Only BBF personnel with the title of CEO, President, or VP are authorized to agree to alter Contract Terms and Conditions or the use of an alternate Bill of Lading referencing such terms and conditions. No other person is authorized to alter contractual terms and conditions nor is any other person authorized to use an alternate Bill of Lading. Where a Bill of Lading other than the Uniform Bill of Lading or BBF's Bill of Lading is issued by the shipper and signed for by BBF's driver or other employee, that signature ONLY acknowledges receipt of the freight and identifies the entity to deliver. It is NOT a contract for the carriage of freight and the continued use of an unauthorized Bill of Lading by the shipper and will NOT constitute an implied acceptance by BBF.

This rules Tariff is an integral part of the Bill of Lading Contract and of all contractual relationships of BBF. This Rules Tariff contains the Terms and Conditions specifically governing the Bill of Lading, Loss and Damage Claims, Undercharges, Overcharges, and related matters. Refer exclusively to this Rules Tariff to determine the process and time limitations in effect. If there is a conflict between the BBF Rules Tariffs and contracts and any governing publication, or any bill of

lading or shipping document prepared in connection with a shipment, the BBF Rules Tariff and Contracts will control and govern the movement of goods.

Bills of Lading marked "Collect" will be rated per consignee published pricing. Should consignee have no pricing, shipper rates will be extended as a courtesy and funds will be collected at the time of delivery. In such instances, shipper exceptions on accessorial charges or fuel surcharges will not be extended to the consignee.

Bills of Lading with no class or NMFC number represented will be billed using a default class of 150. If debtor has an FAK, then FAK for class 150 will apply. Adjustments to default class rating will be at BBF discretion if requested post-delivery.

Special Bill of Lading instructions that conflict with BBF Rules Tariff provisions shall be considered null and void in all cases.

When BBF receives two(2) or more shipments from the same shipper, on the same date, at the same place, consigned to the same consignee at a single place, BBF may at its option combine the bills of lading for all such shipments into a master Bill of Lading and handle all such shipments as a single shipment. Such consolidated shipments shall be subject to all rules, regulations, and charges that would apply if they had all been tendered to BBF as a single shipment.

ITEM 320-INTERLINES OR AGENTS

Density is based on the total cubic feet of all articles or pieces in the shipment. Density is determined as follows:

1. To determine the density of a cylindrical shaped article or any article other than a square, elliptical or rectangular shaped article in a single plane, square the greatest dimension on the cylindrical or other than square, elliptical, or rectangular plane (multiply the dimension by itself) and multiply that result by height or length. If result is in cubic inches, divide by 1,728 cubic inches (one cubic foot). The density shall be a division of the weight of the article by the ascertained cubic feet.
2. Freight bill information: When this item has application, BBF's freight bill will indicate both the actual weight and the calculated weight upon which the charges are assessed.
3. The provisions of this item are not applicable in connection with shipments subject to:
 - a. Capacity Load or exclusive use of vehicle provisions, or;

APPENDIX A-APPLICATION OF FUEL SURCHARGE

All rates and charges published in any tariff BBF participates in, Contracts or Pricing Agreements, or Computer Rating Systems applying single line or jointly with a concurring carrier are hereby or will on their effective dates be increased as provided below for the period this Notice is in effect, unless otherwise specifically stated to the contrary.

The fuel surcharge will be added to all freight charges for line haul transportation and to all charges for other services that consume fuel.

In applying the surcharge provided herein, first determine the applicable net freight charges, including all applicable increases or discounts, if any. The net freight charge so determined will be the charge to which the surcharge provided herein will apply.

The Fuel Surcharge will be adjusted (increased or decreased) to take effect on Wednesday of each week based on the U.S. Department of Energy's Weekly Retail On-Highway Diesel Prices of the prior Monday (or the next business day if Monday is a U.S. Government holiday). The web URL is: <http://tonto.eia.doe.gov/oog/info/wohdp/diesel.asp>

When the price of diesel fuel is 202 cents or less, the Less Than 20,000 lb. fuel surcharge will decrease by 0.10% for every one-cent reduction in the price of fuel, through 109 cents per gallon. When the price of diesel fuel is 591 cents per gallon or greater, the LTL fuel surcharge will increase by an additional 0.10% for every one-cent increase in the price of fuel.

When the price of diesel fuel is 202 cents or less, the Greater Than 20,000 lb. fuel surcharge will decrease by 0.20% for every one-cent reduction in the price of fuel, through 109 cents per gallon. When the price of diesel fuel is 591 cents per gallon or greater, the TL fuel surcharge will increase by an additional 0.20% for every one-cent increase in the price of fuel.

The published average diesel price will be rounded to the nearest whole cent when applying the formula shown above. Fractions of less than one half cent will be dropped. Fractions of one half cent or greater will be increase to the next whole cent.

The proceeds of the Fuel Surcharge Tariff increases are being passed along to the individuals or entities actually bearing the burden of the increased fuel cost.

NOTE A - The term "NET FREIGHT CHARGES" referred to herein applies to all charges, including some accessorial charges for services that consume fuel.
